Information correct as at 11th February 2020.

At McDonald's we believe in the nutritional principals of balance, variety and moderation and that eating at McDonald's can fit into a healthy lifestyle. Our goal is to provide you with the information necessary to make informed decisions about your McDonald's menu choices. This guide can help you balance your McDonald's meal with the other meals you eat today, and every day.

This guide is for our standard or core menu items. For information regarding short-time menu items, please either ask a manager in one of our restaurants or contact our Customer Service Department either via our website <a href="http://mcdonalds.com.au/contactus">http://mcdonalds.com.au/contactus</a> or on 02 9875 7100.

The nutrition and ingredient information is based on standard product formulations, standard product assembly and standard serving sizes (including ice for drinks from our beverage system). Actual sizes and assembly may vary. Due to the individual preparation of each of our menu items, actual values may vary from those listed. Variations may also occur depending on the local supplier, region of the country, and the season of the year. Further, product formulations may change periodically.
