

Remember that you can type in your font size to suit and you do not have to stick to the ones given in the drop down box.

Spread letters apart or closer together (tracking). Double click here to get a hidden toolbar that helps do more!

Stop things jumping around by putting things in front of and behind each other. Group things together by holding CTRL and selecting things you want to stay joined.

This shows all the individual elements that makes up my poster. Don't try to use every colour or font! Stick to tones and shades that enhance your work and makes it a good design.

Space everything evenly, explore the toolbars. **No word art!**

Don't forget your border as this will help determine where your page is if you design over the edge of the page as I have done.
